## Solar Energy Digital Thermometer

Embedded structure, stainless steel shell, LCD screen, clear digital display, easy to distinct. Wide temperature range, strong anti-interference; Double solar-energy batteries enable it work in low illumination; Long term free maintenance; Front panel water-proof cleaning. It is suitable for various refrigerant equipments such as refrigerant cabinet and display cabinet.

- ◆ Temperature measuring range:  
-50°C~+80°C (150°C is available when customize high temperature sensor)
- ◆ Resolution: 0.1°C
- ◆ Accuracy: ±1°C (-20°C~ +80.0°C),  
±2°C (-50°C~ -20°C, +80°C~+150°C)
- ◆ Sampling period: 10s
- ◆ Sensor wire length: 1m
- ◆ Power supply: Solar energy batteries
- ◆ Operation environment:  
illumination level: ≥100Lux,  
humidity: 5%~85%RH,  
temperature: -20°C~+60°C
- ◆ Specification: Diameter 75.5mm×Thickness 24mm
